

Career Counselling Notes

Workshops Attended

PRP Career Services Work Readiness Workshop

Topics covered:

- Career Planning and Industry Expectations for ICT Graduates
- Interview Preparation with a focus on Tech Roles
- Crafting CVs and Cover Letters tailored for IT positions.
- Workplace Communication Skills in Agile/Tech Teams

Key Learnings

- Gained clarity on career opportunities in software development, systems analysis, and project management.
- Understood the importance of tailoring my CV to specific job roles in the tech industry.
- Learned best practices for virtual and in-person interviews in ICT-related job environments.
- Acquired communication strategies for professional environments, especially within cross-functional teams.

Personal Insights

- I discovered that my strengths in problem-solving and communication align well with roles such as Project Manager or Business Analyst.
- I plan to enhance my CV with more measurable achievements from my academic projects and GitHub contributions.
- The session motivated me to practice mock interviews and refine my LinkedIn profile to attract recruiters in the tech sector.
- I now feel more confident in presenting myself professionally in ICT job markets, both locally and internationally.
